

SEO Best Practices

Search Engine Optimization (SEO) is the process of improving a website's visibility in search engines.

The main ranking factors include:

- High-quality content - Page loading speed - Mobile friendliness - Internal linking
- External backlinks - Structured data - HTTPS

Google recommends creating helpful, original, and user-focused content.

Keyword stuffing should be avoided.

Images should include descriptive alt attributes.

URLs should be short and descriptive.

Pages should have unique title and meta description.

Core Web Vitals influence rankings.

Content should be updated regularly.
